

HYGIENE TOP OF MIND

HAND
HYGIENE

CLEAN HANDS, SAFE HANDS

HAND HYGIENE

Being healthy & feeling positive go hand-in-hand. Building awareness of hygiene is a contribution to decrease diseases, to reduce absenteeism and boost productivity in offices, schools, hospitals, etc.

**Help creating a hygienic environment.
Hygiene starts with washing your hands:**

1. PAPER TOWELS ARE THE MOST HYGIENIC DRYING METHOD*

Paper Towels Reduce bacteria on the hands **-77%**

Jet Air Dryers increase bacteria on the hands **+15%**

Warm Air Dryers increase bacteria on the hands **+245%**

Source: *comparing bacteria on hands before and after washing and drying. Study conducted by European Tissue Symposium & Westminster University.

2. USERS PREFER PAPER TOWELS TO DRY THEIR HANDS

Source: Press Information - ETS - Users' Preference Survey 2010

3. ANTIBACTERIAL SOAP SUPPORT OPTIMUM HAND HYGIENE

- decreases bacteria by **- 90%**
- high degreasing power
- leaves skin soft

4. ANTIBACTERIAL DISPENSERS MAINTAIN HIGHEST HYGIENE STANDARDS

Long lasting antibacterial action through "Silver Ions"

Dispenser surfaces are treated with Silver Ions, which act as antimicrobial agent, by disrupting the internal cell life process of bacteria **- 99,99%**

The perfect combination for highest hygiene standards and satisfied users:

PAPER TOWELS +
ANTIBACTERIAL DISPENSER+
ANTIBACTERIAL SOAP

Hygiene awareness leads to a healthier life and helps reducing sickness. Provide the right tools to reduce the threats of spreading germs.
